Fit Buddy AI – AI Fitness Plan Generator using Gemini Models

Generative AI Project | FastAPI + Google Gemini

Mariya Darshini (Team Leader), S. Harini, R. Subhashri, S. Mythili

Problem statement

Many people want a structured workout routine but do not know which exercises suit their age, weight, goal and fitness level. Generic plans ignore these details and rarely adapt when the user wants changes.

Project problem

A single beginner-friendly web application is needed to accept a user's details, goal and preferred intensity, then generate a structured 7-day workout plan with a nutrition or recovery tip using Generative AI, and let the user refine the plan through feedback.

Target users

Beginners, students and general users who want a weekly workout plan, and coaches or admins who want to view users and their plans in one place.
