

Code Layout, Readability and Reusability

Fit Buddy AI – AI Fitness Plan Generator using Gemini Models

Generative AI Project | FastAPI + Google Gemini

Mariya Darshini (Team Leader), S. Harini, R. Subhashri, S. Mythili

Project organization

The development package separates the app (main, config, database, models, schemas, crud, routes), services (Gemini, fallback, serializers), templates, static CSS, tests and data instead of placing everything in one file.

Readability

Clear file names, logical modules and Pydantic schemas make the code easy to follow and maintain.

Reusability

The AI service layer and the plan schemas are shared by both the web form routes and the JSON API routes, and the fallback generator can be reused whenever the AI service is unavailable.
